The ancient Greek numeral system, known as Attic or Herodianic numerals, was fully developed by about 450 BCE, and in regular use possibly as early as the 7th Century BCE. It was a base 10 system similar to the earlier Egyptian one (and even more similar to the later Roman system), with symbols for 1, 5, 10, 50, 100, 500 and 1,000 repeated as many times needed to represent the desired number.

GREEK MATHEMATICS & MATHEMATICIAN - Numerals and Numbers

The intelligent and perspicacious Hipparchus, ancient Greek mythologist made many mathematical contributions throughout his lifetime. He was the founder of trigonometry and the first to develop a reliable method to predict solar eclipses. He possessed the first mathematical trigonometric table. 9.

Mathematics in Ancient Greece. (eBook, 2012) [WorldCat.org]

Mathematics in ancient Mesopotamia. Until the 1920s it was commonly supposed that mathematics had its birth among the ancient Greeks. What was known of earlier traditions, such as the Egyptian as represented by the Rhind papyrus (edited for the first time only in 1877), offered at best a meagre precedent. This impression gave way to a very different view as historians succeeded in deciphering and interpreting the technical materials from ancient Mesopotamia.

Mathematics in ancient Greece (Book, 2006) **[WorldCat.org]**

Historians traditionally place the beginning of Greek mathematics proper to the age of Thales of Miletus (ca. 624–548 BC). Little is known about the life and work of Thales, so little indeed that his date of birth and death are estimated from the eclipse of 585 BC, which probably occurred while he was in his prime.
