Science in Early Modern Europe challenged ancient beliefs while at the same time building upon scientific achievements of the Middle ages. This scientific revolution corresponds to the period historians refer to as the Enlightenment which is to early modern science and philosophy as the Renaissance is to early modern art, or as historian Merry E. Weisner-Hanks says, "The Enlightenment was a self-conscious intellectual movement in the same way as the Renaissance had been."

The Sciences In Enlightened Europe

The history of science during the Age of Enlightenment traces developments in science and technology during the Age of Reason, when Enlightenment ideas and ideals were being disseminated across Europe and North America. Generally, the period spans from the final days of the 16th and 17th-century Scientific Revolution until roughly the 19th century, after the French Revolution and the Napoleonic era. The scientific revolution saw the creation of the first scientific societies, the rise of Coperni

In Enlightenment Europe, however, there was a growing impatience with systems. The most creative of scientists, such as Boyle, Harvey, and Leeuwenhoek, found sufficient momentum for discovery on science's front line. The controversy was creative because both rational and empirical methods were essential to progress.
