MATH 2210 is primarily a linear algebra course, but it also provides an introduction to linear ordinary differential equations. Some of the linear algebra in MATH 2210 is then used to develop multivariable and vector calculus in MATH 2220. MATH 2210-2220 is taught at a higher theoretical level than MATH

Resume: This brief book presents an accessible treatment of multivariable calculus with an early emphasis on linear algebra as a tool. Its organization draws strong analogies with the basic ideas of elementary calculus (derivative, integral, and fundamental theorem).
